SUBTRACTION STRATEGIES

Following are the solutions to the word problems given by two of the students in a class. Check their work and write the strategy used under their work. If incorrect, solve it correctly. If solved correctly then solve using a different strategy.

1) Teddy and Frank solved the following word problem: There are 11 flowers in the basket. 9 flowers are sunflowers and the remaining are rose flowers. How many rose flowers are there in the basket?

There are 11 flowers in the basket. 9 flowers are sunflowers and the remaining are rose flowers. How many rose flowers are there in the basket?

Teddy's work	*Frank's work*

$11 - 9 = 2$

$11 - 9$

10 1

$10 - 9 = 1$

$1 + 1 = 2$

Strategy : _____   Strategy : _____

a)

b)
