

NAME _____

DATE _____

SUBTRACTIONS

Solve by using take from ten and count on strategies. Check the strategy that is easiest.

Example:

a) $14 - 8 = \underline{6}$

$10 - 8 = 2$

$2 + 4 = 6$

b) $8 + \underline{6} = 14$

= 8

= 6

$8 + 6 = 14$

 take from ten. count on.

1. a) $11 - 8 = \underline{\quad}$

b) $8 + \underline{\quad} = 11$

 take from ten. count on.

2. a) $13 - 8 = \underline{\quad}$

b) $8 + \underline{\quad} = 13$

 take from ten. count on.

3. a) $15 - 8 = \underline{\quad}$

b) $8 + \underline{\quad} = 15$

 take from ten. count on.
