## ADDITION/SUBTRACTION

## Problem solving and understanding questions.

1) Mr. Passerini handed out 10 vanilla, 2 chocolate and 8 strawberry ice creams cones. How many ice cream cones did she hand out in all? Show your thinking using words, math drawings or a number sentences.

## Using words:

Mr. Passerini handed out

$$
\text { Total ice creams cones }=10+2+8
$$

Vanilla ice cream cones $=$ $\qquad$ .

Chocolate ice cream cones $=$ $\qquad$ .

Strawberry ice creams cones = $\qquad$ .

$$
=10+10
$$

Strawberry ice creams cones $=$
$\qquad$

By math drawing:

$$
10+10=
$$

By using number bond:
