## ADD OR SUBTRACT

### Problem solving.

Your little brother has \$ 4 and wants to spend the money on an action figure that costs \$ 10. How much money does he still need to buy the action figure.

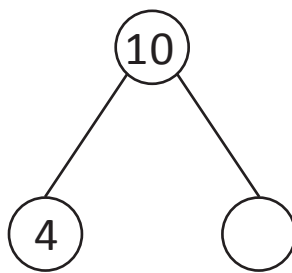

Money with the little brother = \_\_\_\_.

Cost of an action figure = \_\_\_\_.

Money required more to buy an action figure = ?.

---

We can get the answer by making number bond.

More money required to this little brother to buy the action figure = \_\_\_\_
