

NAME _____ DATE _____

ADDITION OR SUBTRACTION

Solve using a simplify strategy. Use scratch paper if needed.

Example:

a) $740 - 690 = \underline{50}$.

$$700 - 600 = 100$$

$$100 + 40 - 90$$

$$\cancel{90} + 10 + 40 - \cancel{90} = \underline{50}$$

1) $530 - 430 = \underline{\hspace{2cm}}$.

$$500 - 400 = \underline{\hspace{2cm}}$$

$$100 + 30 - 30 = 100$$

2) $530 - 400 = 130$.

$$500 - 400 = \underline{\hspace{2cm}}$$

$$100 + 30 = \underline{\hspace{2cm}}$$

3) $530 - 460 = \underline{\hspace{2cm}}$.

$$500 - 400 = \underline{\hspace{2cm}}$$

$$100 + 30 - 60 = 100 - 60 + 30$$

$$\underline{\hspace{2cm}} + 30 = \underline{\hspace{2cm}}$$
