Solve the problems, write the basic facts which helps you solve each one.

Example:

$$14 - 1 = \underline{13}$$

$$\text{Basic fact} = \underline{4} - \underline{1} = \underline{3}$$

$$1) \quad 14 + 1 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$5) \quad 19 + 7 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$2) \quad 15 + 3 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6) \quad 16 + 4 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$3) \quad 18 + 2 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$7) \quad 12 + 8 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$4) \quad 17 - 6 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$8) \quad 15 + 1 = \underline{\quad}$$

$$\text{Basic fact} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
