## PROBLEM SOLVING QUESTIONS

Draw and solve the problems by using numbers, pictures or number bonds.

1. Moses has 100 stickers. Jared has 60 stickers. Jared wants to have the same number of stickers as Moses. How many more stickers does Jared need?

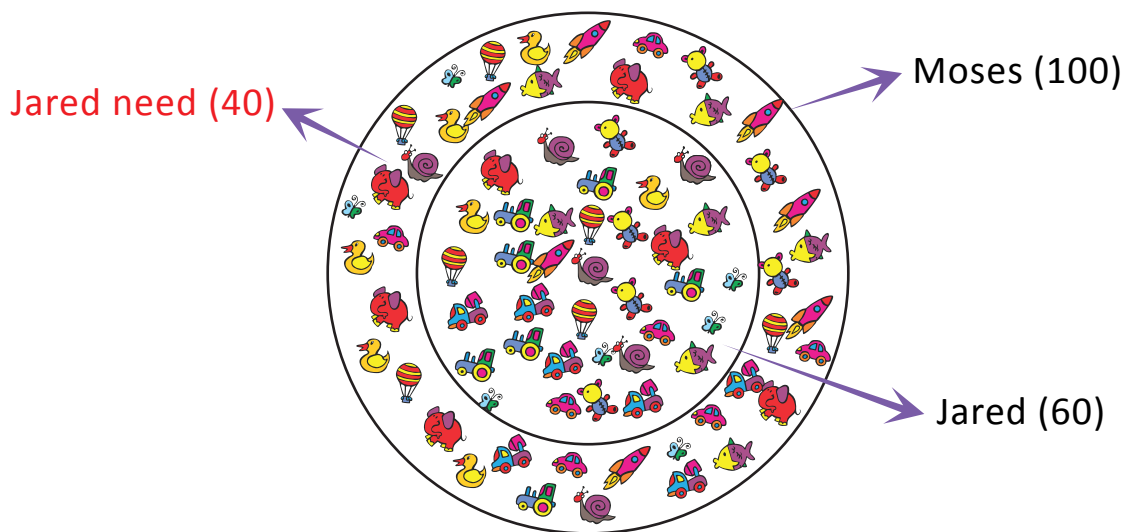

Stickers with Moses = 100

Stickers with Jared = 60

Jared wants to have the same number of stickers as Moses

More stickers that Jared need =  $100 - 60 = \underline{40}$
