## COUNTING MONEY WITHOUT USING COINS

## Solve word problems involving the total value of a group of bills.

1) Jeremy has 3 one dollar bills and 1 five dollar bill. Jessica has 2 ten dollar bills and 2 five dollar bills. Sam has 2 ten dollar bills and 4 five dollar bills. How much money do they have together?

## Solution:

Jeremy has:
One dollar bills (3) = __ dollars.
Five dollar bills $(1)=\ldots$ dollars.

$$
\text { Total }=\__{+}^{+}=\ldots \text { dollars. }
$$

Jessica has:
Ten dollar bills $(2)=$ $\qquad$ = $\qquad$ dollars.
Five dollar bills $(2)={ }_{Z}+\ldots=\ldots$ dollars.

$$
\text { Total }=\ldots+\ldots=\ldots \text { dollars. }
$$

Sam has:
Ten dollar bills (2) = $\qquad$ $=$ $\qquad$ dollars.
Five dollar bills $(4)=$ $\qquad$ $+$ $\qquad$ $+\ldots+$ $\qquad$ $=$ dollars.
$\qquad$
Total $=$ $+$ dollars.

Total money with them all = $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.
2) Mr. Change has 4 ten dollar bills, 3 five dollar bills and 6 one dollar bills. How much money does he have in all?

## Solution:

Mr. Change has:
Ten dollar bills (4) = $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

Five dollar bills $(3)=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

One dollar bills (6) = $\qquad$ dollars.

Total money he have in all = $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

## By arrow way:

$40 \xrightarrow{+10}$

$(5+6=10+1)$
