REPRESENTING DOLLARS IN DIFFERENT WAYS

Represent the dollars in different ways and then fill the blanks given.

Example:

Represent \$142 in two different ways using only \$1, \$10 and \$100 bills.

1st method

\$100 \$10 \$10 \$10

\$10 \$1 \$1

Expanded form = 100 + 40 + 2

Numerical form = 142

2nd method

\$10 \$10 \$10 \$10

\$10 \$10 \$10 \$10

\$10 \$10 \$10 \$10

\$10 \$10 \$1 \$1

Expanded form = 14 tens + 2 ones

= 140 + 2

Numerical form = 142

1) Represent \$109 in two different ways using only \$1, \$10 and \$100 bills.

1st method

Expanded form = _____ + _____

Numerical form = _____

2nd method

Expanded form = _____ + _____

= _____ + _____

Numerical form = _____
