

NAME _____ DATE _____

ATTRIBUTES OF GEOMETRY SHAPES

Use attributes to identify and draw different quadrilaterals including rectangles, rhombuses, parallelograms and trapezoids.

Example:

Observe the 15 centimetre scale.

1 cm	2 cm	3 cm	4 cm	5 cm	6 cm	7 cm	8 cm	9 cm	10 cm	11 cm	12 cm	13 cm	14 cm	15 cm
---------	---------	---------	---------	---------	---------	---------	---------	---------	----------	----------	----------	----------	----------	----------

Using the measurement scale find length of the following articles to the nearest centimetres.

- a) Your pen 8 cm b) Eraser 3 cm c) Pencil 7 cm
 d) Small stick 14 cm e) Small piece of thread 11 cm

- 1) Prepare 15 centimetre scale with a thick paper and draw lines and numbers.

Take 10 groom sticks in different sizes and measure its length and record in your note book (nearest centimetres).

Groom sticks	1	2	3	4	5	6	7	8	9	10
Its lengths (centimetres)
