ADDITION OR SUBTRACTION

Solve each problem using two different strategies.

1) 456 + 244 = _____

1st strategy:

(By arrow way)

$$456 \xrightarrow{+100} 556 \longrightarrow 656 \xrightarrow{+40} \underline{\quad} \xrightarrow{+4} 700$$

2nd strategy:

(By using number bond)

456 + 244 = _____

456 + 244

56   44

50   40

= 400 + 200 + 50 + 40 + 6 + 4

= _____ + 90 + _____

= 600 + _____ = 700
