## PROBLEM SOLVING QUESTIONS

## Problem solving questions related to reasoning and thinking. Example:

Mrs. Sullivan's students are collecting cans for recycling. Frederick collected 20 cans, Danielle collected 9 cans and Myna and Charlie collected 100 cans. How many cans did the students collected in all?

Cans collected by Frederick = $\underline{20}$

Cans collected by Danielle $=\underline{9}$

Cans collected by Myna and Charlie $=\underline{100}$

Total cans collected by the students $=\underline{129}$

Do the following problems basing on the above given example.

1. Mrs. Roy's students answered the objective type questions from different papers Samaritan answered 60, Sahaj answered 8 and Richard answered 100. How many total questions answered by all the three students?

Questions were answered by Samaritan $=$ $\qquad$

Questions were answered by Sahaj = $\qquad$

Questions were answered by Richard $=$ $\qquad$
