## COUNTING MONEY WITHOUT USING COINS

## Solve word problems involving the total value of a group of bills.

1) At her yard sale, Danielle got 1 twenty dollar bill and 5 one dollar bills last week. This week she got 3 ten dollar bills and 3 five dollar bills. What is the total amount she got both weeks?

## Solution:

Danielle got money last week: Twenty dollar bill (1) = $\qquad$ dollars. One dollar bills $(5)=\ldots$ dollars .

This week: Ten dollar bills (3) = $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars. Five dollar bills $(3)=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

She got total amount for both weeks: $\qquad$ $+\ldots+$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

By arrow way:
$20 \xrightarrow{+30}$
$\xrightarrow{+10}$ $\qquad$ $\longrightarrow 70$
$(15+5=10+10)$
2) Patrick has 2 fewer ten dollar bills than Brienne. Patrick has $\$ 64$. How much money does Brienne have?

## Solution:

Patrick has $\qquad$ dollars.

Patrick has $\qquad$ fewer ten dollar bills than Brienne.

Money with Brienne = $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.
3) Alexis has $\$ 95$. She has 2 more five dollar bills, 5 more one dollar bills and 2 more ten dollar bills than Kasai. How much money does Kasai have?

## Solution:

Kasai has fewer money than Alexis:
Five dollar bills $(2)=$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

One dollar bills $(5)=\ldots$ dollars.
Ten dollar bills $(2)=$ $\qquad$ $+$ $\qquad$ $=$ $\qquad$ dollars.

$$
\text { Total }=\ldots_{+}^{+}+\ldots=\ldots \text { dollars. }
$$

Money with Brienne $=$ $\qquad$ - $\qquad$ = $\qquad$ dollars.
