PROBLEM SOLVING

Solve the following problems using ones, tens and hundreds.

- 1) There are 600 tens mangoes are there in the garden. Each tree has exactly 100 tens mangoes. How many trees are there in the garden?

Number of mangoes in a garden = _____ tens.

Mangoes exactly have for each tree = _____

we know that

10 tens = __ hundred = **100**

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

100 **100** **100** **100** **100** **100** **100** **100** **100** **100** = _____ tens.

= _____ tens.

_____ hundreds are equal to _____ tens.

Number of trees in the garden = _____
