## COUNTING NUMBERS IN GROUPS

### Problem solving questions.

1. The tea maker sold 100 cups of tea in a day at the main center of the city and got Rs. 900. How many more persons need to have to get the tea.

**Note:** (10 cups of tea is Rs. 100. Explain your answer using words, pictures or numbers).

Tea maker got Rs 900 by selling tea.

10 cups of tea Rs. 100.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

 = \_\_\_ cups of tea for \_\_\_\_.

\_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups + \_\_\_ cups = (100 + 100 + 100 + 100 + 100 + 100 + 100 + 100 + 100) Rs.

\_\_\_ cups of tea = \_\_\_\_ Rs.

Number of persons need to have to get the tea = \_\_\_\_.
